

## Century Tower • 343 Pitt Street

A development to watch in the future, this is a very well maintained development in the heart of the city located close to Town Hall. Century Tower was completed in 1997 by Sunlord Holding Pty Ltd and until 2002 held the title of Australia's tallest residential building with a total height of 183 metres.

Century Tower incorporates the façade of old Lismore Hotel and rises 52 storeys with levels 51 and 52 having four Penthouse apartments per floor. Those residents fortunate to be high enough in the complex enjoy breath-taking views over the city, east out over Hyde Park and on to The Heads, north to the city with some Harbour Bridge Glimpses and south to Botany and west as far as the Blue Mountains.

The local area will undergo big change as the Greenland Tower (Sydney's Largest Residential Tower) this will help transform this part of the city with a 5 Star Hotel and new shopping complex planned. Sydney Council also plans to re-develop the Lane ways either side of the tower to offer more pedestrian friendly access between Pitt Street and George Street.
