

The Eliza • 141 Elizabeth Street

Designed by Tony Owen Partners and developed by Ceerose the Eliza was completed in 2014. With its contoured and sculptured asymmetrical façade creating a curvaceous appearance, state of the art winter gardens and attention to detail with every floor shaped differently and each apartment designed individually The Eliza sets a new benchmark in six-star luxury city living.

Residents enter from the street through a grand lobby with a curved sandstone wall, limestone floors, laser-cut timber screens and onyx-clad lifts. On the ground level, Eliza will have a business centre, library, lounge area, meeting room and a concierge – facilities more in keeping with a boutique hotel.

Each residence showcases a calibre of contemporary European styling and is crafted to the highest level of detail. From the fireplace to the full-height timber-panelled walls, CBUS lighting and the electronically-controlled curtains. Each designer kitchen features limestone floors, Calcutta marble bench tops, splashbacks and a walk-in butler's pantry. Appliances are of the finest quality, including a hand-crafted stove, oven, range hood, dishwasher and steamer from Gaggenau. The fully-integrated fridge is from Liebherr, the double bowl sinks from Abey Quadrato, and the tap ware from Gessi Rettangolo.
