## Greenway 1 and 10 year price growth

| Property | Current Price | 1Y $ Growth | 1Y % Growth | 10Y $ Growth | 10Y % Growth |
|---|---|---|---|---|---|
| HOUSE | $770K | – $100K | -11.4% | + $241K | +45% |
| UNIT | $550K | – $75K | -12.1% | + $75K | +16% |

Source: Neoval

## Greenway 10 year price trend

Source: Neoval

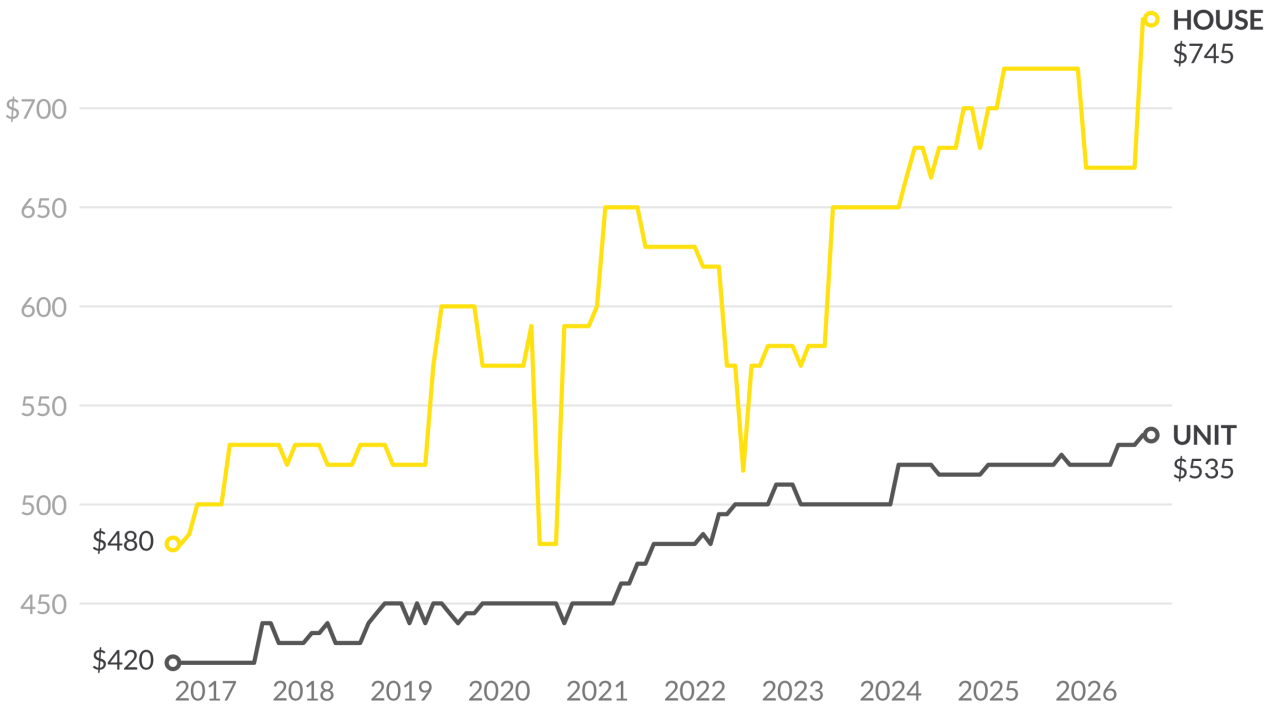

In September 2026, Greenway's median house price stands at approximately $770K. This reflects a notable 11.4% decrease since this same month last year; however, over the past decade, houses have recorded a solid gain of 45.4%, representing an increase of around $241K. Unit prices in the area reached approximately $550K, experiencing a 12.1% decline over the past year. Despite these recent adjustments, unit values have grown by an estimated 16% over the last ten years, a gain of about $75K. This performance has occurred alongside a period of broader market softening, showcasing enduring long-term value.

## Greenway rental price growth

| Property | Current Price | 1Y $ Growth | 1Y % Growth | 10Y $ Growth | 10Y % Growth |
|---|---|---|---|---|---|
| HOUSE | $745 | + $25 | +3.5% | + $265 | +55% |
| UNIT | $535 | + $15 | +2.9% | + $115 | +27% |

Source: Neoval

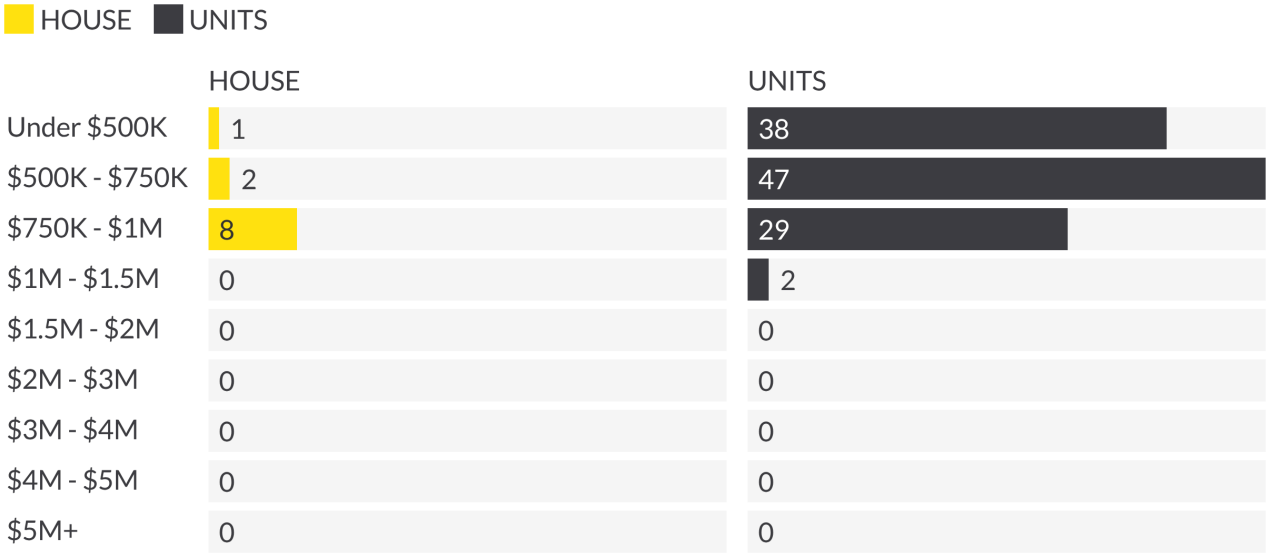

## Greenway rental price trend

Source: Neoval

Greenway's median weekly rental rate for houses currently stands at an approximate $745, recording a solid 3.5% gain from this same month last year and a substantial 55.2% increase over the past decade. Median weekly unit rents, approximately $535, reflect a 2.9% rise from this same month last year, coinciding with a 27.4% growth across the past ten years. This continued upward trajectory in rental rates represents resilient local market performance.

# Greenway 12M rolling sales count

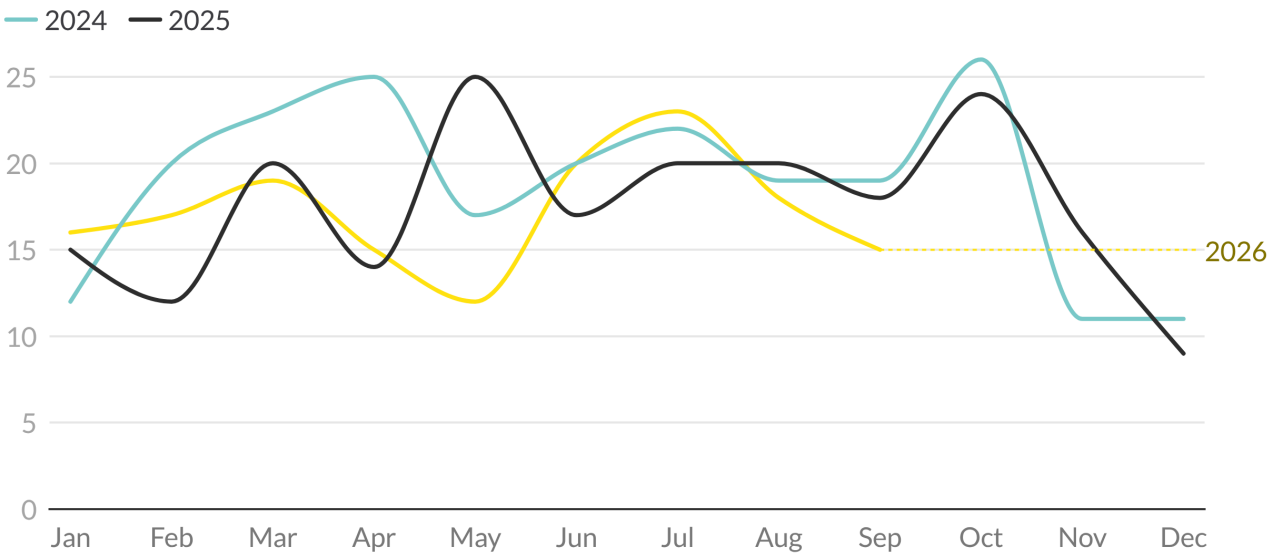

Source: Neoval

As of July 2026, Greenway's property market reflects a compelling distribution across price points, with the unit segment demonstrating significant activity. It recorded a solid gain, notably with 47 sales in the $500K - $750K bracket, alongside 38 units transacting for under $500K, underscoring strong affordability. House sales, while fewer, were concentrated with 8 properties in the $750K - $1M range, representing the dominant mid-tier. Activity above $1M remained limited, with only 2 unit sales between $1M and $1.5M, and no sales for either property type beyond $1.5M. This overall spread represents an accessible market, maintaining a distinctive position compared to broader capital city trends.

## Greenway monthly volume of new listings over the past 3 years

Number of new monthly listings

Listings from whole market including Ray White.

Source: Neoval

New listings in September 2026 recorded a notable 16.7% monthly decline, reaching 15 properties in Greenway. This figure also represents a 16.7% fall compared to September 2025 and a 21.1% decrease from September 2024, reflecting persistent supply constraints. The reduction in available stock reinforces limited vendor activity, a trend observed across broader markets.

# Methodology

**Pricing data**

Price data is sourced from our research partners at Neoval Research Group, providing comprehensive coverage across all major Australian capital cities and regional markets. Price movements are calculated using median values to ensure accurate representation of typical market performance.

**Why median?**

The median provides a reliable measure of the "typical" market price by identifying the middle value when all sales are arranged in order. Unlike arithmetic averages, which can be distorted by extreme high or low sales, the median represents the price point where half the properties sold for more and half sold for less. This methodology is particularly valuable when analysing property markets as it reduces the impact of outliers – such as exceptionally expensive waterfront properties or distressed sales – providing a truer reflection of what most buyers and sellers experience in the market. The median effectively captures the centre of the market distribution, making it an ideal measure for tracking genuine price movements over time.
Tasmania exception: Due to licensing restrictions, median data from Neoval is not available for Tasmania. For Tasmanian markets, we utilise the Median Sales AVM Value from Cotality, which represents the median (50th percentile) estimated sales value of all properties based on the hedonic imputation method.

**ABS region segmentation and naming convention**

Our analysis utilises the Australian Bureau of Statistics (ABS) geographical classification system, employing GCC, SA4, SA3 and SA2 naming conventions as the statistical and computational standard established by the ABS. This hierarchical structure provides a consistent framework for analysing property markets at various geographical scales, from major metropolitan areas down to individual SA2s. The visual representation and practical application of these classifications can be explored through the ABS mapping portal at https://maps.abs.gov.au, which displays the 2021 GCC, SA4, SA3 and SA2 shape files. These are the same shape files and naming conventions used by Neoval in their price modelling computations, ensuring consistency between our data sources and official statistical boundaries.

For comparative analysis purposes, the Sunshine Coast and Gold Coast regions are classified alongside GCC Major City regions. This classification reflects their substantial price growth over recent years and their common comparison with major metropolitan markets. Given their economic significance and market characteristics, these regions are considered Major City regions for the purposes of this analysis.

**Listing data**

National property listing volumes are sourced from Domain, Australia's leading property portal, providing comprehensive coverage of new property listings across all markets. National listings: presented as monthly counts spanning the last three years (2023-2025) to identify seasonal patterns and year-over-year trends in property supply. Major city and regional listings: current month data is presented with both monthly percentage change (comparison to previous month) and annual percentage change (comparison to same month in previous year) to highlight both short-term fluctuations and longer-term supply trends.

**Sales count data**

Sales count data by price point is sourced from Australian Property Monitors (APM) and Valuer General records, providing transaction data across all fixed price segments for market segmentation analysis. While filtered for residential properties only, some commercial or rural properties may be incorrectly classified as residential in the source data, potentially affecting data precision.

**Temporal framework**

All data series are presented on a monthly basis covering the three-year period from 2023 to 2025, enabling identification of seasonal patterns, cyclical trends, and year-over-year comparisons. This timeframe captures the full interest rate cycle from peak rates through to the current cutting cycle, providing context for current market dynamics. All data sources represent substantial market coverage but may not capture 100 per cent of market activity. Price data from Neoval provides broad market representation. Regional variations in data coverage may exist, with metropolitan markets generally providing more comprehensive data.

**Commentary Generation Methodology**

The market commentary throughout this report was generated using Google's Gemini 2.5 Flash, a state-of-the-art large language model chosen for its exceptional ability to analyse complex datasets and translate them into clear market insights. The model was fed comprehensive data from both our national report along with region specific metrics, enabling it to contextualise local movements within broader market trends. Through multiple iterations of refinement, we optimised the system to provide straightforward, factual descriptions of the data presented in charts and tables, avoiding speculation while highlighting key trends and significant data points. This approach represents our ongoing efforts to deliver consistent, data-driven commentary that accurately reflects underlying market information in accessible language for both property professionals and general readers.
